## HOME AUTOMATION TIE-IN

### AUTOMATION TIE-IN CABLE

\* Home Automation System is to supply to EACH conductor a Momentary Dry Contact, Normally Open. (3-Contacts Total: Open, Close, & Stop)

THE HOME AUTOMATION MANUFACTURER NEEDS TO PROGRAM A WARNING SCREEN, LIKE THE EXAMPLE SHOWN BELOW, TO INFORM THE HOMEOWNER/USER THAT THERE IS A MANUAL LOCK THAT NEEDS TO BE UNLOCKED BEFORE OPERATING THE AUTOMATION.

### WARNING NOTICE

You must manually UNLOCK this door before operating the door automation. Not doing so will damage the motor and void the warranty.

By pressing this button I agree to the above statement and have UNLOCKED the door

Pressing this button will then take the user to the OPEN, CLOSE, & STOP buttons to command the relays to send to our controller.
